

Lighthouse Lookout

Can you find each of the four lighthouses off our shore?

Portsmouth Harbor

This lighthouse was first constructed in 1771 as a 78 foot tall wooden tower. In 1878, this lighthouse was renovated to be built of cast iron and is now standing at 48 feet tall.

Location: Portsmouth, NH

Wood Island Life Saving Station

This building is not a lighthouse! The current structure was built for the US Lifesaving Service in 1908. Later, in 1915, it became a part of the US Coast Guard!

Location Kittery, Maine

Whaleback

Originally built in 1820, and renovated again in 1872, this lighthouse stands at 59 feet tall and is made entirely out of stone.

Location: Kittery, Maine

To see the lighthouses, stand facing the water and use the park map on the back to orient yourself!

Boone Island

This lighthouse was built in 1811 as a 50 foot granite tower on a barren 300x700' shoal in the Gulf of Maine. In 1855, the lighthouse was renovated to stone and is now the tallest lighthouse in New England at 133 feet tall!

Location: York, Maine

White Island

Originally built in 1820 as a stone tower of 87 feet, this lighthouse was one of the first lighthouses in the U.S to have fresnel lens. In 1859 the once stone tower was renovated to be made of brick and is now standing at 58 feet tall.

Location: Rye, New Hampshire
