SCIENCE CENTER

IMPACT REPORT
Fall 2019

INSPIRING CONSERVATION OF OUR BLUE PLANET
The **Seacoast Science Center** has been dedicated to advancing marine and environmental education and conservation since 1992.

This Impact Report includes data from fiscal year 2018 and organizational highlights through Spring 2019.

The Seacoast Science Center is a 501(c)3 non-profit organization providing educational experiences at Odiorne Point State Park on behalf of New Hampshire State Parks.

2019 Fall Impact Report | 3
When people ask me what the Seacoast Science Center is all about my answer always comes in two parts: the what and the why. First, I explain the what: the Center is a respected community resource with a 27-year history of excellence in connecting people to the wonders of our coastal environment. It is a place where families, friends, and school children gather to experience our exceptional seaside location and learn more about the world around them.

But, the Seacoast Science Center is much more than a place to visit for a morning or afternoon. We support the consensus of the scientific community that the earth’s climate is changing at an unprecedented rate that is detrimental to quality of life. That is why we are committed to advancing conservation of our Blue Planet in all that we do.

It is our top priority to help people understand the implications of climate change and declining ocean health and kindle their desire to preserve and protect our natural resources. We also understand the power of collaboration and believe that is our responsibility to engage our community in conversations about rising ocean temperatures, ocean acidification, and marine debris. That is why we are dedicated to fostering our relationships with non-profits in our region that share our conservation interests. That is why we are strengthening our partnerships with local, state, and federal governments. That is why we are expanding our connections with our colleagues in the marine sciences at places like the University of New Hampshire and Shoals Marine Lab.

As we aspire to be a community anchor institution for New Hampshire, we believe that it is our role to reflect the insight of a diverse team of like-minded individuals and organizations in ways we can all benefit from the shared knowledge, shared resources, and a shared voice.

Thank you for being on our team. Together, we can make a real difference.
I recently had the pleasure of attending the Gulf of Maine 2050 Conference in Portland, Maine. There I saw in stark terms the challenges that lay ahead for those of us living along the coast in places where economy, environment, and culture are defined by the Ocean. As I listened, I thought about Seacoast Science Center’s role as an agent for change in light of the opportunities and challenges that lay ahead. How could our small institution best leverage our location, museum setting, and educational expertise to be the best change agent for New Hampshire? Then, as I sat there with 400 scientists, educators, and policy makers, it occurred to me. Collaboration. Through the power of collaboration, Seacoast Science Center can truly be an agent of change.

SSC is often recognized as a place for children but it is our collaboration with other educators, learning scientists, museum professionals, and parents that really makes our programming valuable in the community. SSC’s knack for collaboration has helped to improve your experience at the Center and your experience within Odiorne Point State Park. In just the last few weeks, SSC has worked in meaningful ways with our friends and colleagues at the Shoals Marine Laboratory and the Center for Wildlife in York, ME. Further afield, we’ve engaged with the EcoTarium in Worcester, MA; the Wild Center in Tupper Lake, NY; and the South Carolina Aquarium in Charleston, SC to name but a few. We’ve hosted the Governor and Executive Council, worked with members of NH’s Congressional delegation, and met with state legislators and local officials. We’ve chaired meetings for large regional education organizations and participated in roundtable workshops with Executive Directors from 13 museums from all over the northeast. We are, at our core, collaborators and conveners.

Engaging with people of different perspectives and experiences is what SSC does best. It makes us smarter. It makes us more adaptable. And it positions us to be the best asset for New Hampshire that we can be. Education and conservation may be the touchstones of our mission but it is through collaboration that we can best spark curiosity, enhance understanding, inspire conservation and help advance the change that we would like to see in our world.

Your Friend in Conservation,

Jim Chase
PRESIDENT
MISSION & VISION

OUR MISSION
To spark curiosity, enhance understanding, and inspire conservation of our Blue Planet.

OUR VISION
The Seacoast Science Center envisions a healthy World Ocean.
The Importance of Environmental Conservation and the World Ocean  We believe that the World Ocean plays a prominent role in our daily lives—moderating our climate, providing sustenance and valuable resources, as a place of biodiversity and natural wonder, and as a critical cultural mainstay of Seacoast New Hampshire. We realize that we have an inherent responsibility to nurture and conserve our natural resources, advance ocean health, and preserve our deep cultural connections to coastal land, the coastal watershed, and the sea.

The Inspiration of Locale  We believe that Odiorne Point State Park plays an integral role in the Seacoast Science Center achieving its mission. We recognize that by engaging visitors, first-hand, in the significant natural features and history of Odiorne Point State Park, we are able to facilitate learning, appreciation, and the understanding of the interconnectedness between land and sea.

The Power of Personal Experiences  We believe that personal experiences and engagement are fundamental to meaningful education and hold the key to conserving the World Ocean. Through education and the interpretation of Odiorne Point State Park, we can foster awareness, enhance environmental literacy, advance natural resource conservation ethics, and move people to action, thus facilitating change that will help to ensure a healthy, sustainable natural environment and World Ocean for future generations.

Meaningful Relationships  We believe that the Seacoast Science Center’s human resource is its most valuable asset. We value a diverse and inclusive community, and will model, promote, and implement this vision.

The Spark of Innovation  We believe that only through innovation can we consistently provide an engaging, contemporary visitor experience. By keeping our content current, we can do our part to prepare our students, visitors, and constituents to address present and future challenges to the health, abundance, and sustainability of the World Ocean.

The Necessity of Sustainability  We believe that the Seacoast Science Center must be an example in our community through what we teach, what we advocate for, and how we act as individuals and representatives of the institution. How we operate as an organization must represent a positive example of how to live in a manner that promotes environmental conservation and helps to sustain a healthy World Ocean.
BUILDING A COMMUNITY OF OCEAN STEWARDS

Everyday, we connect people to the wonders of our natural world, helping them gain a deeper understanding of the interconnectedness between land and sea, and inspiring them to nurture and conserve our natural resources and World Ocean.

**Empowering young naturalists**

Our preschool, camp, and school programs foster children’s natural curiosity about the world around them and empower them to think like young scientists and naturalists.

**Training future ocean champions**

High school students gain practical experience as they explore marine science topics in-depth, work with mentors to develop research projects, and learn about career path options during our Marine Biology Camp and Marine Biology Fellowship programs.

**Families learning together**

Families learn about local and global ocean conservation issues during fun evenings out with STEM community partners during our Night at the Museum program series.

**Understanding challenges**

Our Eco-Adventures take people to destinations around the globe to learn how other coastal communities are dealing with the challenges of climate change and sustainability. In October 2019, we traveled to Churchill, Manitoba to learn how scientists are monitoring the polar bear population in the Arctic and what is being done to protect them.

**Zero Waste Events**

SSC’s popular annual events bring individuals, families, and business members together to raise awareness of environmental conservation and celebrate our World Ocean. In 2019, our sponsors and vendors joined us in committing to going Zero Waste, using only reusable, recyclable and compostable materials. Our dedicated volunteers eagerly stepped up to help facilitate the initiative and inspire event-goers to “go green.”

OUR SSC FAMILY

Seacoast Science Center is honored to have earned the confidence and commitment of those who have joined our family and stand with us in support of critical thinking, education, and the environment.

MEMBERS
Over 1,300 member families who reside in 16 states are invested in our mission and are our greatest ambassadors. They take pride in knowing they are helping us build a community of ocean stewards who care about the future of the sea.

DONORS AND SPONSORS
Our supporters know when they invest in the Seacoast Science Center they are investing in their community and in the conservation of our Blue Planet. Their support is critical to the Center’s continued success. For a list of 2018 contributors, please see pages 16-18.

VOLUNTEERS
The Center was built on a strong foundation of volunteerism, and that tradition continues. As teachers and ambassadors, volunteers play an essential role in advancing the Center’s mission to inspire conservation of our Blue Planet. In 2018, our volunteer program enlisted 744 year-round and one-time project volunteers who engaged, inspired, and had a blast!

INTERNSHIPS
We are committed to providing high-quality internships that help advance college students’ studies in marine science, environmental education, and non-profit business management. The Seacoast Science Center Internship Program plays an important role in helping to build a workforce of environmentally-minded citizens. In 2018, SSC mentored 15 interns.

PARTNERSHIPS
We embrace the power of collaboration and work with many federal and state agencies and community partners to enrich our offerings, expand our reach, and meet our strategic goals. (See page 11)
STRENGTH THROUGH PARTNERSHIP

To better understand and protect our marine resources, we recognize the importance of partnering with organizations and agencies that are working to understand the challenges facing our natural resources and how we can best, together, work toward solutions to protect our local waters and our World Ocean.

SSC President Jim Chase (R) joined (L-R) Jennifer Felt of Conservation Law Foundation, U.S. Senator Shaheen, and Charles Raeburn of Blue Ocean Society in our nation’s capitol this spring to advocate for NOAA funding in support of science education and ocean conservation.

In September, Great Bay National Estuarine Research Reserve, Piscataqua Region Estuaries Partnership, Conservation Law Foundation, and Fox Point Oysters joined SSC to update our Ocean Ambassador donors about the work being done to monitor and improve the water quality of Great Bay.

This year, we committed to making our signature events zero waste and partnered with Sustainable Seacoast to offer filtered water refill stations and Mr. Fox Composting to supply compostable serviceware and upcycle all waste.

SSC Marine Mammal Rescue Manager Ashley Stokes and MMR staff work with New England Aquarium’s Animal Rescue and necropsy teams to cover demands and assist with sea turtle rehabilitation.

Kate Leavitt, SSC Director of Mission (L) takes a break for some fun with colleagues from UNH’s Center for Coastal and Ocean Mapping and University of Hawaii’s College of Education during this year’s National Marine Educator’s Association Conference.

In September, Great Bay National Estuarine Research Reserve, Piscataqua Region Estuaries Partnership, Conservation Law Foundation, and Fox Point Oysters joined SSC to update our Ocean Ambassador donors about the work being done to monitor and improve the water quality of Great Bay.

10 | 2019 Fall Impact Report
Seacoast Science Center & Odiorne Point State Park

SSC partners with the following:

**FEDERAL AGENCIES**
- Marine Mammal Health and Stranding Response Program
- National Aeronautics and Space Administration
- National Marine Fisheries Service Law Enforcement
- National Oceanic and Atmospheric Administration
- National Science Foundation

**STATE AGENCIES**
- NH Department of Environmental Services
- NH Fish and Game
- NH Parks and Recreation
- Rockingham Planning Commission

**INSTITUTIONS & COLLABORATIONS**
- Allied Whale
- Blue Ocean Society for Marine Conservation
- Center for Wildlife
- College of the Atlantic
- CommuteSMART Seacoast
- Conservation Law Foundation
- Educational Passages
- Global Aquaculture Alliance
- Great Bay National Estuarine Research Reserve
- Gulf of Maine Marine Education Association
- The Gundalow Company
- International Fund for Animal Welfare
- McAuliffe-Shepard Discovery Center
- Monterey Bay Aquarium Seafood Watch®
- Mystic Aquarium
- National Marine Educators Association
- National Marine Life Center
- New England Aquarium
- New England Ocean Action Network
- New England Ocean Science Education Collaborative
- New Hampshire Environmental Educators
- New Hampshire PBS
- NH EPSCoR (Experimental Program to Stimulate Competitive Research)
- Northeast Regional Association of Coastal and Ocean Observing Systems
- Piscataqua Regional Estuaries Partnership
- Rozalia Project
- Shoals Marine Laboratory
- Squam Lakes Natural Science Center
- Star Island Corporation
- Surfrider Foundation New Hampshire Chapter
- Sustainable Seacoast
- University of New Hampshire
- UNH Marine Docents
- UNH Sea Grant

Seacoast Science Center is proud to provide educational programs and interpretive services in Odiorne Point State Park as part of its long-standing partnership with New Hampshire Division of Parks and Recreation. Odiorne’s significant natural habitats and rich social history provide many opportunities for us to advance understanding of the interconnectedness between the land and the sea.
Seacoast Science Center Marine Mammal Rescue advances wildlife conservation through marine mammal field response, triage care, and community outreach in New Hampshire and Northern Massachusetts (from Essex, MA to the Maine border).

MMR AND NETWORK PARTNERS SURPRISED BY RARE SIGHTING

Only two species of dolphin are typically seen in the Gulf of Maine: Atlantic white-sided dolphin and short beaked common dolphin. In August 2019, the SSC Marine Mammal Rescue team starting receiving reports of bottlenose dolphin sightings in the Merrimack River. Bottlenose dolphins are a warm water animals and the team thought perhaps the reports were a case of mistaken identity. After consulting with experts from NOAA Fisheries and other stranding network partners, the animal was confirmed to be a wayward bottlenose dolphin, likely a juvenile drawn into the river to feed on its abundant fish. Since the dolphin was exhibiting normal behaviors, it was decided to monitor it as long as it remained in the river while keeping an eye on water quality. After five weeks of monitoring the animal, it was last sighted near the mouth of the river on September 20th. Although unconfirmed, our MMR team presumed that the dolphin moved into the open ocean and headed south to find warmer waters.

While it is impossible to determine why this southern visitor swam in our cold waters, we know that the data collected during our observations are now an important part of scientific records on marine mammal ecology. Data collected during this and all MMR response cases are not only providing insight on health trends and behaviors for specific species, but also information on the health status of the Gulf of Maine and the World Ocean, as marine mammals are regarded as sentinels of the sea.

Number of response cases as of September 30, 2019

Shae Kelliher
MARINE MAMMAL RESCUE PROGRAM INTERN

I am honored to be the first SSC Marine Mammal Rescue program intern. I joined the team in June 2019 after graduating from the University of New England with a BA in Marine Affairs paired with a minor in Climate Change Studies, so this experience could not have come at a more perfect time! My internship has allowed me to expand my knowledge and confidence in areas such as rescue procedure and public education. I feel extremely fortunate to have the opportunity to improve the well-being of these animals and educate caring beachgoers about wildlife ecology and the importance of our work.

24-HOUR REPORTING HOTLINE:
603-997-9448
YOUR SUPPORT AT WORK

OPPORTUNITIES OF ALL
Your support of the Coastal Education Fund and Campership Fund provides opportunities for students who may otherwise be unable to participate in Seacoast Science Center programs and opens doors for future scientists, climate activists, and environmental educators.

COMMUNITY SCIENCE IN ACTION
Your contribution helps us deliver programs like BioBlitz, a day-long community science event where families explore the habitats of Odiorne with biologists and field experts to identify and record data on species found, providing valuable insight on biodiversity in our region.

UPGRADES IN ANIMAL HUSBANDRY
Your support made it possible for us to be better care takers of our animal ambassadors. This year, we added new holding and quarantine tanks and upgraded our culinary preparation station, allowing for safer and more efficient care and feeding of our exhibit animals.
FINANCIAL OVERVIEW

The 2018 SSC financial information is presented on an EBDITA basis.
HIGHLIGHTS AT-A-GLANCE

90,000 visitors annually

1,300 total member families from 16 states + more...

32,500 children participate in youth & school programs annually

744 year-round & special project volunteers

17,285 total hours $430,372 total value

20 year round staff

55 seasonal staff

2,400 plant & animal species identified in Odiorne Point State Park during BioBlitz since 1st BioBlitz in 2003

933 response cases as of 10/15/19 since MMR was established in 2014

685 harbor seals

66 gray seals

119 harp seals

3 hooded seals

19 harbor porpoises

1 bottlenose dolphin

3 unknown pinniped species

2 unknown cetacean species

4 common dolphins

5 atlantic white-sided dolphins

2 humpback whales

6 minke whales

1 pygmy sperm whale

20 unknown
OCEAN CHAMPIONS

Odisone Point Fund of the NH Charitable Foundation
PSNH Fund for Public Education Programs
of the NH Charitable Foundation
Thomas W. Haas Foundation
West Marine BlueFuture Fund
On October 2, 2019, Governor Chris Sununu and the NH Executive Council presented the Seacoast Science Center a commendation for its dedication to marine education and for being an invaluable resource for the protection of NH’s coastline. Governor Sununu congratulated SSC for its 27 years of providing science-based education that inspires curiosity and conversation about the natural world. The Governor also recognized that SSC’s unique location in Odiorne Point State Park allows people to experience New Hampshire’s coastal environment and learn about the heritage of the coastline. SSC also received accolades for its mission to encourage conservation and preservation of our natural resources through engaging, hands-on education opportunities and for its Marine Mammal Rescue program’s work to protect stranded animals and the public alike.
in Odiorne Point State Park
570 Ocean Boulevard
Rye, New Hampshire 03870
